

Travel is demanding - for you and your baggage. When getting to a sales or repair call, the last thing you need to worry about is whether your valuable equipment will arrive intact. Transporting heavy gear from the airport to your destination can be a struggle you really don't need. You don't have to worry if you check a Hardigg Grab 'n Roll case. It's the sturdiest - and most portable - case of its kind. This incredibly durable rotomolded case features industrial and military design details to ensure your sensitive equipment is safe inside, no matter what the environment is outside. And with wheels and convenient telescoping handle, it's a breeze for you to move - single-handedly. With the Hardigg Grab 'n Roll case, hitting the road isn't punishing to your gear - or you.

Grab 'n Roll

If you transport heavy, sensitive equipment, you don't have to sacrifice your gear, or your back. Hardigg Grab 'n Roll cases deliver proven Hardigg protection with the convenience of a hand truck built right in. Developed for military applications, the cases are **engineered to protect** their contents **in the most hostile environments**. Because they're far more durable than other wheeled cases, a Grab 'n Roll is an economical choice for the long haul.

Grab 'n Roll cases are rotomolded from polyethylene, for a **resilient shell** that's 15% thicker in the corners, to provide extra impact resistance where it's needed most. **Rounded corners** won't damage other cargo - or you. Since the **color is molded in**, the finish won't show chips or scratches. Acid and solvent resistant, the cases are **decontaminable**, too. Wheel housings and hardware are recessed, with molded-in inserts and durable metal catches and strikes. And the molded-in parting line closes tight to seal out moisture every time.

Grab 'n Roll cases feature a unique, **two-position telescoping handle** for leverage to move the heaviest load. With the telescoping handle locked down, out of the way, strong plastic "**Comfort Grip**" handles on both ends enable the cases to be carried easily, too. **Oversized wheels** are designed to **rotate smoothly**, for effortless steering and dependable performance.

Interior protection options for Grab 'n Roll cases include **custom-engineered foam inserts**. Rugged and reliable, Grab 'n Roll is a classic Hardigg case: engineered to perform, and tested to prove it. See for yourself. Hardigg Grab 'n Roll cases can lighten your load.
