

SKID-MATE® & SKID-MATE+PLUS®

**AIR CUSHIONED PALLET PROTECTION
PROVIDING PROTECTION WHERE IT'S NEEDED MOST**

Every year shock and vibration causes millions of dollars of damage during transport and handling of sensitive and valuable equipment.

The SKID-MATE® is an air dampened cushioning device that provides a fast, cost effective and durable customized solution to protect sensitive products from shock and vibration. The SKID-MATE® can be easily mounted on a crate or pallet base creating an air-ride cushion in place of hardwood skid runners eliminating the need for expensive air-ride trucks.

Each color coded SKID-MATE® corresponds to a specific load range and allows users to calculate their requirements simply and easily to avoid potential laboratory testing and use of expensive packaging materials.

SKID-MATE®

SKID-MATE® cushions provide maximum cushioning and dampening performance with a minimum of size and weight. The SKID-MATE® air dampened cushioning devices are easily attached to a pallet base with a 5/16" - 18 UNC bolt threaded into the molded-in insert. (See reverse for more details. Metric M8 option is available.)

SKID-MATE+PLUS® is a SKID-MATE® cushion, plus a rugged polyethylene 1-1/8" thick spacer disk. The addition of the spacer to the SKID-MATE® increases the total height to 4", capable of accepting most pallet jacks worldwide.

SKID-MATE+PLUS®

	Tan Load Range Per Pad: 20-35lbs (9.1-15.9kg) P/N 35-630-035T		Blue Load Range Per Pad: 70-125lbs (31.8-56.7kg) P/N 35-630-125T
	Green Load Range Per Pad: 30-50lbs (13.6-22.7kg) P/N 35-630-050T		Orange Load Range Per Pad: 125-225lbs (56.7-102kg) P/N 35-630-225T
	Yellow Load Range Per Pad: 45-80lbs (20.4-36.3kg) P/N 35-630-080T		Spacer Black P/N 2-020-00509

* Master Pack 96/Box

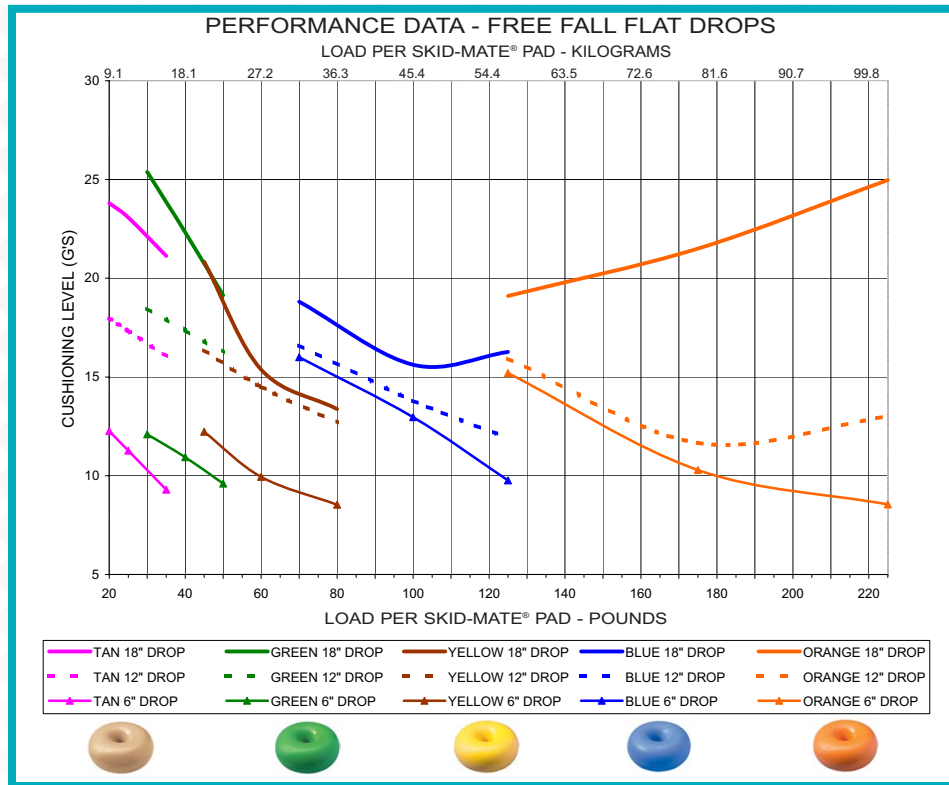

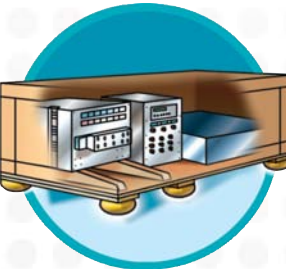

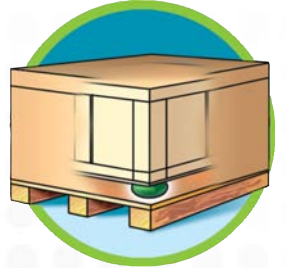

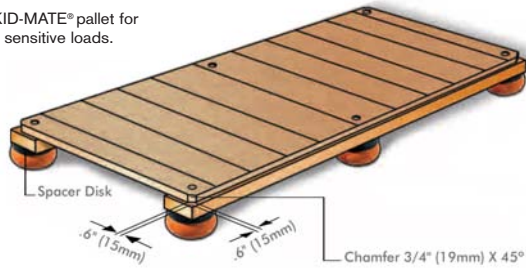

- Reduce packaging design & assembly time and cost
- Eliminate costly damage from handling hazards during shipment
- Reduce costs associated with shock and vibration damage
- Provide protection during loading/unloading
- Eliminate the need for expensive air-ride vans
- Permit 4-way pallet entry design
- Easily add shock protection to crates/pallets
- SKID-MATE+PLUS® fits most pallet jacks worldwide

SKID-MATE®

PROTECTION AGAINST SHOCK & VIBRATION

Typical SKID-MATE® pallet for heavy and sensitive loads.

SHOCK RESISTANT

Reduce costly field service calls and repairs resulting from shock and vibration damage in transit.

DURABLE & TOUGH

Under the maximum load, cushions can endure 3000 feet (914 meters) of dragging over concrete and floor joints.

HIGH/LOW TEMPERATURES

Cushions are suitable for use between -40 F and +130F (-40 C to +54 C).

CHEMICAL RESISTANT

Cushions are made of polyethylene, a chemically inert material.

RECYCLABLE

Every cushion is environmentally friendly and reusable.
